

Stressgard®

Overview

Redefine Your Normal

Bayer Stressgard creates a better golfing experience that redefines normal. It is proven technology available in a portfolio of products that mitigates stress and delivers consistent turf quality.

////// *Versatility*

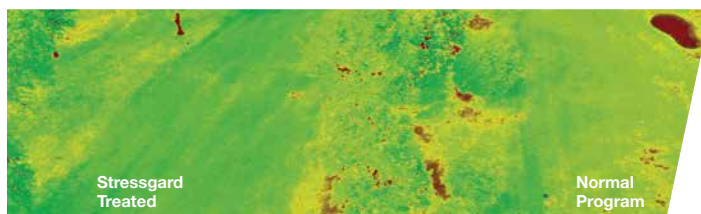

- // Manages both biotic and abiotic stresses
- // Less restrictive, not AI based
- // Multiple solutions available in a portfolio of products

////// *Consistency*

- // Performance in all weather conditions
- // Immediate aesthetic improvement
- // Long lasting results from enhanced plant processes

////// *Satisfaction*

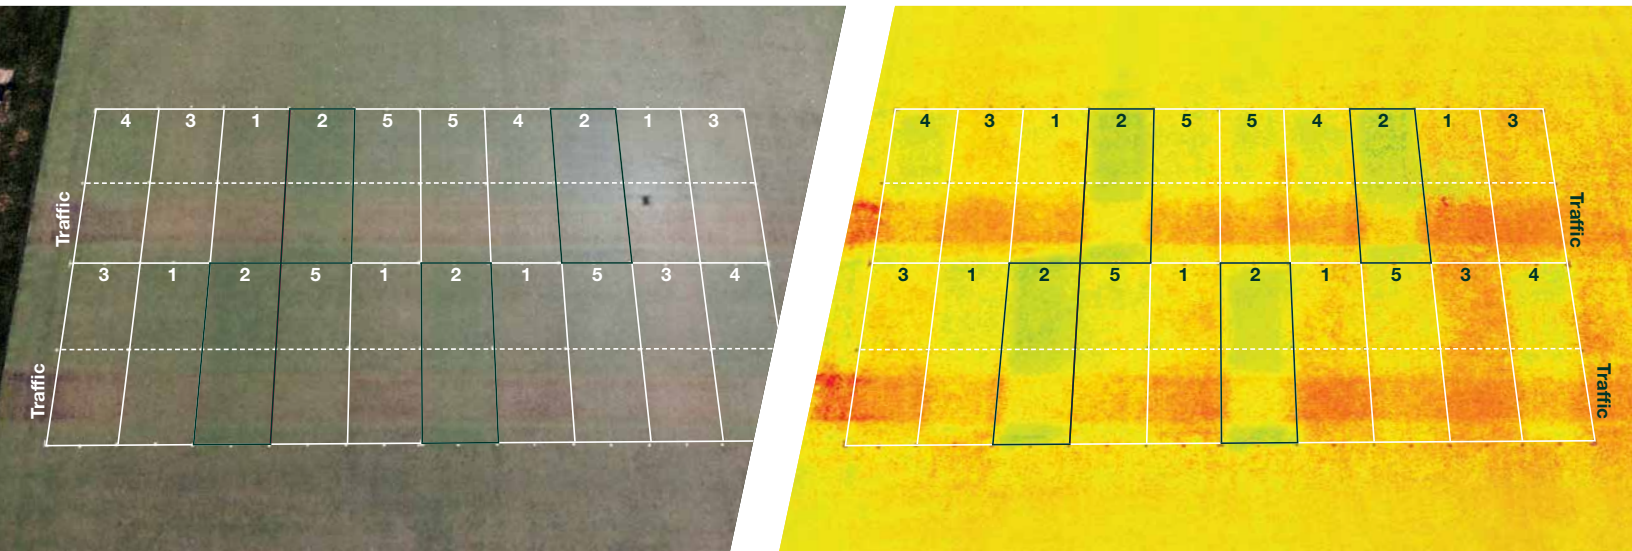

- // Improves course conditions, the primary driver of golfer satisfaction
- // Less worry about turf performance
- // More time to do the things you love

Digital imagery analysis for hue angle as indication of visual turf quality.
Green - good, orange - poor.

Overview

2018 Rutgers University Traffic Stress Trial

Treatment Legend

- | | | |
|---------------------------------|--|---------------------------|
| 1. Untreated | 3. Fosetyl 80 WP 4 oz/M – 14 d | 5. Appearl® 6 oz/M – 14 d |
| 2. Signature Xtra 4 oz/M – 14 d | 4. Fosetyl 80 WP 4 oz/M + Pigment – 14 d | |

All treatments applied every 14 days starting May 8. Traffic imposed 6 days per week. Picture taken July 19, three (3) days after 6th application. Images shown are aerial plot photos processed for hue angle as indication of visual quality (green - good, orange - poor). – Jim Murphy, Ph.D., Rutgers University
