

Tempo®
20 WP Insecticide

Product information sheet

Tempo® WP Insecticide is a wettable powder insecticide formulation for use as a general surface spray for control of flying and crawling insects in livestock housing structures, including flies and lesser mealworms (darkling beetles) in poultry houses. As part of Bayer's darkling beetle control product lineup, it is a Group 3 insecticide and may be rotated with Credo® (Group 4) as part of an integrated pest management program.

* In susceptible populations

Bayer Integrated Pest Management (IPM) Solutions

Rotate Tempo® 20 WP (Group 3) or Annihilator POLYZONE (Group 3) with Credo® SC Insecticide (Group 4) to maximize efficacy and reduce the risk of development of resistant pests. Add QuickBayt® to control flies as needed.

Broad spectrum

- Tempo® kills a broad range of pests (flies, beetles and other crawling insects)
- Tempo® kills pests on contact: it is ideal for application after clean-out in poultry facilities

Convenient & Cost effective

- Wettable powder formulation is easy to measure and mix
- An effective darkling beetle control program** can save producers up to \$4,000 per 100,000 birds**

Application information

- For control of flying or crawling pests, apply as a surface spray and/or as a crack and crevice application to areas where insects congregate
- For darkling beetle control apply after clean-out; 19 g of Tempo® can treat 100 m²
- Cover (or remove) water bowls, drinkers and feeders before application
- Cattle can re-enter facilities within 2 hours following application and poultry within 24 hours following application

Pests controlled (Refer to label for full list)	Poultry houses	Cattle barns	Swine barns	Horse barns
Darkling beetles	Yes			
Flies, moths and wasps	Yes	Yes	Yes	Yes
Spiders, ants and earwigs	Yes	Yes	Yes	Yes
